DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 5-9, 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (discussed in the Background of Invention).

The Applicant's APA discloses the structure of the MMC card is a conventional standard memory card;

on the body of the MMC card has a first group of contacts;

the body of claimed SD card is the same as the standard MMC card with additional second group of contacts which is in combination of the first contact to form a SD card contacts;

the standard MMC card receptacle has a slot dimensioned to be mechanically compatible or fit the standard MMC card;

the claimed SD card receptacle has a slot dimensioned to be mechanically compatible or fit the claimed SD card;

since both the standard MMC card and the claimed SD card have the same dimension of the body structure. Therefore, the claimed SD card will mechanically compatible or fit the slot on either standard MMC receptacle or the claimed SD receptacle.

Art Unit: 2833

Whether the dimension of the card body have additional group of contacts or not would have been an matter of design absent the criticality, since mechanically compatible of the card body when insert into MMC or SD card reader is still fitted.
